EMENTA DO CURSO

FortiMail Administrator 7.4

Código: **EDU-FTN-FORTIMAIL** Categoria: **Fortinet**

InLearn

PÚBLICO

Security professionals involved in the management, configuration, administration, and monitoring of FortiMail in
small to medium enterprise deployments should attend this course.

PRÉ-REQUISITOS

You must have an understanding of the topics covered in the FCP - FortiGate Administrator course, or have
equivalent experience.
It is also recommended that you have an understanding of the following topics:
l SMTP
l PKI
l SSL/TLS
l LDAP

VISÃO

Objectives
After completing this course, you should be able to:
l Position FortiMail in an existing or new email infrastructure using any of the flexible deployment modes
l Understand the system architecture of FortiMail: how email flows through its modules; how it applies intelligent routing and policies to email; and how it can protect the reputation of your mail transfer agent (MTA)
l Use your existing LDAP server to manage and authenticate users
l Secure email transmission using best-in-class technologies, such as SMTPS, SMTP over TLS, and identity-based encryption (IBE)
l Throttle client connections to block MTA abuse
l Block spam using sophisticated techniques, such as deep header inspection, spam outbreak, heuristics, and the FortiGuard antispam service
l Eliminate spear phishing and zero-day viruses
l Prevent accidental or intentional leaks of confidential and regulated data
l Archive email for compliance
l Deploy high availability (HA) and redundant infrastructure for maximum uptime of mission-critical email
l Diagnose common issues related to email and FortiMail

CONTEÚDO

1. Email Concepts
2. Basic Setup
3. Access Control and Policies
4. Authentication
5. Session Management
6. Antivirus and Antispam
7. Content Inspection
8. Securing Communications
9. High Availability
10. Server Mode
11. Transparent Mode
12. Maintenance
13. Troubleshooting
